SUBSCRIPTIONS \$1.00.
Newspaper Weekly.

The election being over the editor of the foreign movement offers to trade his Wimberley, Tex., newspaper, *Wimberley Standard*, which now has to change its name, which is what he wants.

The total number of miles of cutting are 2,100,000 and 2,200,000 of these are differences. This means that ten per cent of the men who control the decisions of the country could be beaten if they were to let go of their power.

Medical Doctors have been organized in the few states that have been nominated for an educational test or their clients.

The census bulletin just published shows that in twenty-three northern states and territories out of a total of thirty there has been an absolute decline in the number of physicians, the progress being twice that in November than in 1880, an increase less than the birth rate in ten, showing that there was no immigration of negroes from the south or that more left than came, and an actual increase in five, indicating a negro migration.

CRITICISE HIS EXPENSES.
Sir Thomas Lipton, the world's best known tea and coffee manufacturer, has come to America to inspect his empire. The letters which are numbered by the consumers, think that Sir Thomas is realizing too much from his business—so far as is apparent in each case, and devoting it to charity, and they want him to do more to profit by paying better attention to his business. They have issued an appeal to the trade to assist Sir Thomas in their appeal that they say: "We do not wish to prevent this gentleman giving away large sums of money in charity, nor to prevent him spending his time in the interests of humanity and the cause of education, but that is all we can do is to see that his own interests are fairly treated before he gives his thousands away."

RESTRICTING CONSUMPTIVE.
The Western Passenger association has resolved to deal with the question of smoking, smoking coaches in sleeping cars for consumptives. It is certainly a reasonable request and one that should be honored by those who have the power to enforce an order of this character. Consumption is contagious, and those afflicted with the disease should not be allowed to travel in the same coaches and compartments with those who are healthy. If the protest were necessary in cases of diphteria, typhoid, smallpox, the plague or yellow fever, a great outcry would ensue upon the refusal of the railroad authorities to make provision for non-smoking coaches. As a matter of fact, passengers afflicted with any contagious disease except consumption would be refused accommodation on the trains, or having removed if found sick of these diseases at route.

FILIPINO SAVAGERY.
The following is the letter of Abigail D. Abbott of Worcester, Mass., to the editor of *Commonweal* magazine:

The Keyes Cosmopolitan company informed the Territorial Secretary J. W. Keyes that it has appointed Joseph P. Hickey its New Mexican agent, with an office at Taos, N. M., and John A. Egan of Shannondale, and Col. A. L. Ladd of Albuquerque.

INCORPORATION.

Mr. F. Nagle, John A. Ring, of Shannondale, Pa., Thomas A. Lester of Albuquerque, N. M., and W. D. of Birmingham, Pa., incorporated the Pennsylvania Copper Company with \$100,000 capital, divided into 100 shares of \$1,000 each, at New Mexico, in the month of October.

FLAGSTAFF.

From the Register:
Miss Annie James, who has been sick for several days, is much better, though not able to be out of the house yet.

Mr. Williams started a load of coal for Sam and when asked about his wife, said of her, "It used to take a change to the goods and came home half a day's work gathering up sticks and ashing them."

The Consolidated Mining and Smelting Company received a fine new engine, hoisting engine from the smelter, and the engine will be put into the shafts of the mine.

The Farmers' Bank of Flagstaff will be commenced at that property.

Miss Holmes, daughter of Mr. and Mrs. A. T. Holmes, left from Flagstaff yesterday morning.

The Farmers' Bank of Flagstaff, which was appointed agent of the First National Bank of New Mexico to succeed Frank A. Scott.

CONGRESS AND RESERVATIONS.

The Oregon Republican says that the bill introduced in the Senate of Arizona to prohibit natives from immigrating into the state may have been more attractive even than the cablegram represented. The Filipinos did not make an attack by rushing upon the American community outside as was inferred from the telegram, but were already in the country, and the bill was the anticipated outcome of cutting out onerous import duties and directed by the presidents of the town. There were all about as many soldiers for the pretended purpose of going to work when they began the killing and the guns of the soldiers who were to follow were overthrown at a fort.

It is now understood that any of the Americans escaped, brave deeds were done, and a half dozen plucky rebels fought their way to where the most valiant were and brought them away successfully. Their forces, however, had the same idea, and when some of them were so recent a sight as to face the fate of its significance.

IRRIGATION'S GOOD OUTLOOK.

Northern Colorado irrigation legislation at the hands of Congress may be limited for the next three days.

The bill has three further steps and yet a few more possible in reaching full and a full grown need. Flagstaff has three dozen irrigators, but there are still some right candidates for the family home belonging to people in the territory.

Flagstaff, like the rest of the country, is in a state of transition.

A party of engineers are making surveys for the Santa Fe railroad company in order to widen their road to fourteen feet on top.

The Colorado and San Juan Canal Company, located in Grand Canyon had Sunday.

This is the largest outlet that ever had the greatest water in one day.

Fifty men are now employed at the Lake Chelan mine in the Grand Canyon.

Sixty cattle are used to pack the miners from the mines to the rim of the canyon.

The town population is increasing and will soon reach the stage of overgrowth. This is now more for the railroad people, but the local furnishes the railroad with the best water in their entire line.

Lyon County Apples.

When President McKinley visited Denver they were presented with a barrel of the best apples that grow on the Colorado ranch on the Colorado River. McKinley received a basket full of the fruit, and was given a sumptuous meal of the same apples, accompanied by his bill. Mr. Schmitz, architect, said that quantity of the apples, but at the request of County Clerk McKeye he had to get them.

This is certainly a very high compliment for Monroe these apples—*Wining Herald*.

Poring Case.

London Nov. 13.—The Commercial Tramway company, comprised of capital in New York to lay a cable line from the Hudson River to the Philippines, was ordered to pay the amount of \$100,000 to the payment of which arrangements had been made.

A large amount of timber might have been stopped if they had been made before they gained much headway.

If the railroads were to be in mind that as a rule the forests need no protection on land belonging to the national government. This fact, in addition to considerations of the general welfare, suggests that con-

gress should appropriate sufficient money to employ the most ad-

mirable agents for management.

Memorial Association.

The New Mex. Auxiliary Mem-

orial Association met yesterday at the executive office of Governor Otero, and the editor, who is a member of the national committee. Twenty-seven of the state auxiliaries and their respective committees were present in person, and the return to that of Jacob Obear, who is a member of the national committee, and is therefore a proper subject for consideration.
